

內六角螺栓型球頭柱塞

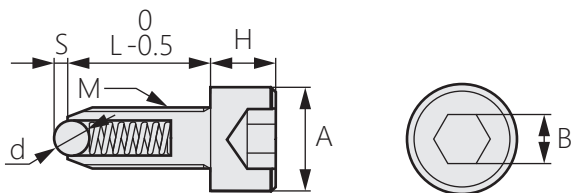

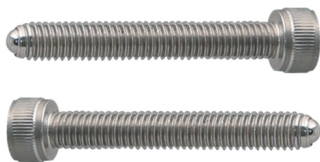

LZ-108

Hexagon socket head bolt type ball plunger

商品介紹 Product description

球頭柱塞結構簡單·針尖球由內部彈簧固定·行程可以將球頭壓再鬆緊帶上即可釋放壓力。

The ball head plunger has a simple structure, the needle point ball is fixed by an internal spring, and the stroke can press the ball head and then put it on the elastic band to release the pressure.
