

商品介紹 Product description

1. 傳動條可拆除，做單點鎖定使用。
2. 傳動體作壓板使用，具密封防水功能。

- 材質：鋅合金(ZDC)、冷軋鋼板
- 表面處理：銀色噴漆
- 用途：機箱機櫃、配電箱等。
- 備註：拆除或變更傳動條位置時，需清楚部件相互連結關係，避免裝配失敗。

1. The drive bar can be removed for single-point locking.
2. The transmission body is used as a pressure plate and has the function of sealing and waterproofing.

- Material: Zinc Alloy (ZDC). Cold rolled steel sheet
- Finish: Silver spray paint
- Uses: Chassis cabinets, distribution boxes, etc.
- Notes: When removing or changing the position of the drive bar, it is necessary to know the connection relationship between the components to avoid assembly failure.
